

User Story

Guests (users without accounts) will be able to search any League of Legends player by Summoner Name, view all registered users on the site, and filter register users based on Rank.

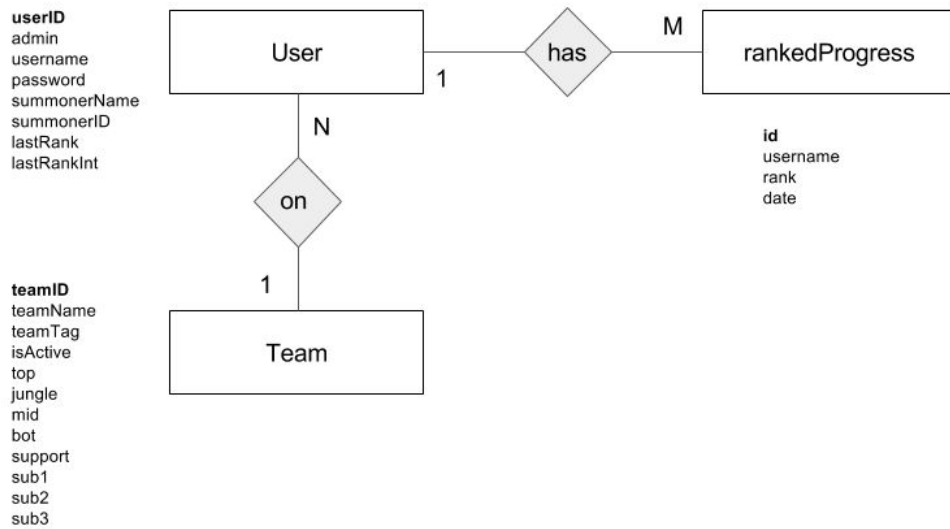

Members of the CSUMB League of Legends club will create an account and log into the user section to update their rank and track their progress as well as look at team rosters. To track ranks, users will simply login to the site, which will update the saved rank and the date. All previous ranks will be displayed in the user dashboard in a table.

Administrators can login to set other users to administrator or delete users.
